Non-GAAP Financial Measures:

In addition to our financial results reported in accordance with GAAP, this press release and the accompanying tables and related presentation materials may contain one or more of the following non-GAAP financial measures: Non-GAAP Gross Profit, Non-GAAP Gross Margin, Non-GAAP Operating Income (Loss), Non-GAAP Operating Margin, Non-GAAP Net Income (Loss) attributable to WalkMe Ltd., Non-GAAP Net Income (Loss) per share attributable to WalkMe Ltd., Free Cash Flow and Free Cash Flow excluding merger transaction costs all of which are Non-GAAP financial measures. We believe that these measures provide useful information about operating results, enhance the overall understanding of past financial performance and future prospects, and allow for greater transparency with respect to key measures used by management in its financial and operational decision making. Non-GAAP financial measures have limitations as analytical tools and may differ from similarly titled measures presented by other companies. The presentation of this financial information is not intended to be considered as a substitute for the financial

information prepared and presented in accordance with GAAP. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these Non-GAAP financial measures to their most directly comparable GAAP financial measures and not rely on any single financial measure to evaluate our business.

Non-GAAP Gross Profit and Non-GAAP Gross Margin. We define Non-GAAP Gross Profit as gross profit excluding share-based compensation, amortization of acquired intangibles and restructuring expenses. We exclude these items because they occur for reasons that may be unrelated to our core operating performance during the period, and because we believe that such items may obscure underlying business trends and make comparisons of long-term performance difficult. We use Non-GAAP Gross Profit with traditional GAAP measures to evaluate our financial performance. Non-GAAP Gross Margin is calculated as a percentage of total revenues.

Non-GAAP Operating Income (Loss) and Non-GAAP Operating Margin. We define Non-GAAP Operating Income (Loss) as net income (loss) from operations excluding share-based compensation, amortization and impairment of acquired intangible assets, restructuring expenses, non-recurring legal settlement expenses related to a complex class action lawsuit and related claims which are considered outside of the company's ordinary course of business and merger transaction costs. We exclude these items because they occur for reasons that may be unrelated to our core operating performance during the period, and because we believe that such items may obscure underlying business trends and make comparisons of long-term performance difficult. We use Non-GAAP Operating Income (Loss) with traditional GAAP measures to evaluate our financial performance. Non-GAAP Operating Margin is calculated as a percentage of total revenues.

Non-GAAP Net Income (Loss) attributable to WalkMe Ltd. We define Non-GAAP Net Income (Loss) attributable to WalkMe Ltd. as Net Income (Loss) attributable to WalkMe Ltd. excluding share-based compensation, amortization and impairment of acquired intangible assets, restructuring expenses, non-recurring legal settlement expenses related to a complex class action lawsuit and related claims which are considered outside of the company's ordinary course of business, merger transaction costs and adjustment attributable to non-controlling interest. We exclude these items because they occur for reasons that may be unrelated to our core operating performance during the period, and because we believe that such items may obscure underlying business trends and make comparisons of long-term performance difficult. We use Non-GAAP Net Income (Loss) attributable to WalkMe Ltd. with traditional GAAP measures to evaluate our financial performance. Non-GAAP Net Income (Loss) per Share attributable to WalkMe Ltd. is calculated based on the periodic weighted average of ordinary shares basic and diluted.

Free Cash Flow. We define Free Cash Flow as net cash provided by (used in) operating activities, less cash used for purchases of property and equipment and capitalized internal-use software development costs and further adjusted to exclude merger transaction costs. We believe that Free Cash Flow is a useful indicator of liquidity that provides information to management and investors, even if negative, about the amount of cash used in our business. Our Free Cash Flow may vary from period to period and be impacted as we continue to invest for growth in our business. Free Cash Flow Margin is calculated as a percentage of total revenues.

For more information on the non-GAAP financial measures, please see the reconciliation tables provided in this press release. The accompanying reconciliation tables have more details on the GAAP financial measures that are most directly comparable to non-GAAP financial measures and the related reconciliations between these financial measures.
